

## **Mapping Missing Accounts in OneView**

In order to map a missing account in OneView, you will need to provide the **Rep Id associated to the account** you would like mapped. In many cases, the fund company will assign their own Rep Id number. This information can be found on a statement or directly from the product sponsor company. Further, you may also be asked for a **DST Account Number** (account number for reporting to Albridge) for just one account with that product sponsor company.

Please have this information available when you request to have accounts linked in OneView.

Attached you will find the instructions to get the DST Rep ID required to access the DST Vision system.
